

SMT Power Metal Inductor

Size 3010

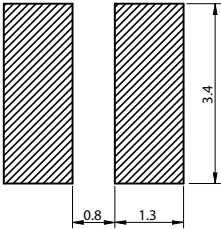

℃℃

Dimensions: [mm]

Land Pattern: [mm]

Electrical Properties:

| Part No | Inductance<br>(μH) | Tolerance | Temperature Rise<br>Current<br>Max.<br>(A) | Saturation<br>Current<br>Max.<br>(A) | DCR<br>Max.<br>(mΩ) | DCR<br>Typ.<br>(mΩ) |
|---------|--------------------|-----------|--------------------------------------------|--------------------------------------|---------------------|---------------------|
|         |                    |           |                                            |                                      |                     |                     |
|         |                    |           |                                            |                                      |                     |                     |
|         |                    |           |                                            |                                      |                     |                     |
|         |                    |           |                                            |                                      |                     |                     |
|         |                    |           |                                            |                                      |                     |                     |
|         |                    |           |                                            |                                      |                     |                     |

℃

## Typical Electrical Characteristics:
